## **OUTCOME ASSESSMENT TESTING SUMMARY REPORT**

The following **OUTCOME ASSESSMENT** was created in order for your doctor to better understand the nature and extent of your injuries. It provides research-validated, useful information crucial in determining a correct and optimal treatment plan. The outcome assessment testing tools are designed to establish baseline pain level, functional status, and other relevant measures. In addition, it documents progress. Specifically, it documents the response of patients to the medical care they are receiving and helps guide in the clinical decision-making process.
